

LookingGlass MSSP Partner Program

Solutions that readily supplement your existing portfolio, initiate new revenue streams, and enhance margins.

- Standardized and highly customizable threat intelligence services for quick adoption that will differentiate you from the competition.
- Security for your customers is much more than patch updates, antivirus and firewalls. With 1 million new malware threats daily, your customers require threat intelligence services.
- Threat intelligence is more than just detection; it has to include response. Your service must be complete with the best and fastest takedown/response guarantee available anywhere.

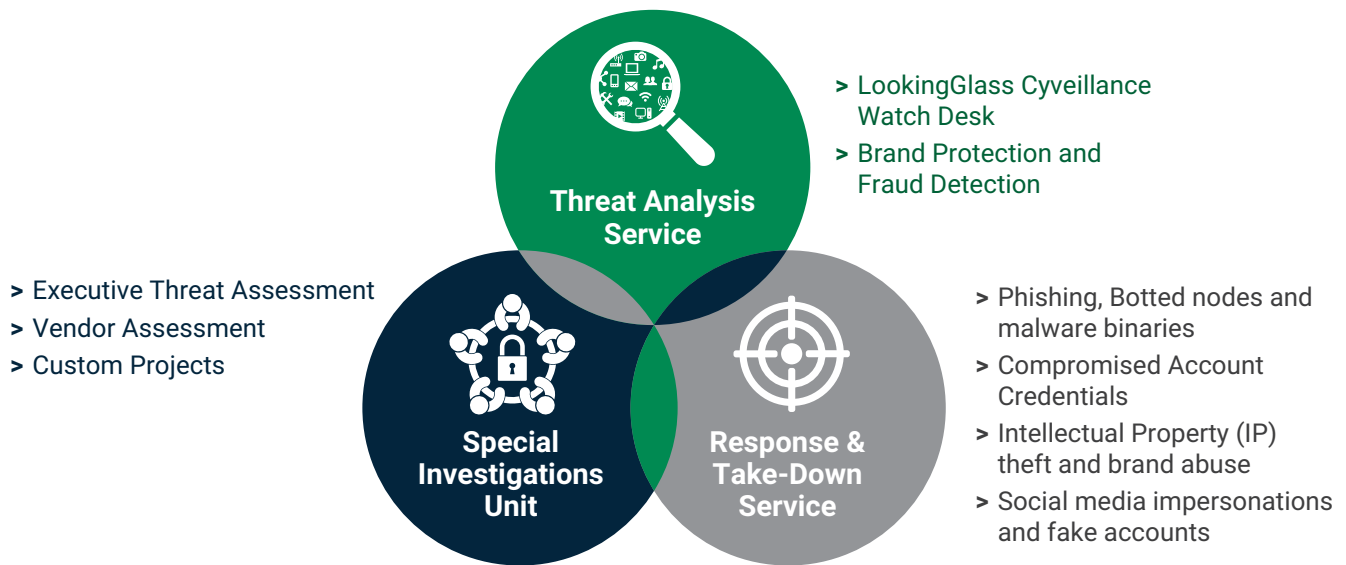

Why LookingGlass?

- A quick and easy way to offer threat intelligence services to your customers; you can be up and running in no time with our ScoutVision as a Service or hosted models.
- Detection and Response services to address your customers' compliance, threat awareness, and remediation requirements.
- Unmatched response times; we don't just detect, we respond. Check out our Phishing Response Takedown, Staydown™ Lifetime Guarantee and you'll see why we're industry-leading.
- The ability to provide threat intelligence services that span SMB to Enterprise markets.
- Because LookingGlass' award-winning threat intelligence platforms come with already integrated open source and proprietary data feeds, you can hit the ground running. No hidden data feed fees or integration development delays.
- An open RESTful API that allows you to write your own integrations to existing or complementary solutions.

LookingGlass Cyveillance Threat Intelligence Services

Get started quickly with these services today!

LookingGlass Cyveillance Threat Intelligence Services

Brand Protection

www.LookingGlassCyber.com

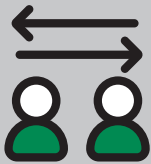

Response & Takedown Services

- Quickly and effectively remove offending and malicious content
- Analysts are native speakers in 20+ language

Executive Threat Assessments

- Monitors for potential physical and information security risks to executives and their families
- Provides privacy best practices and recommendations for lowering online risk profiles

Vendor Threat Assessments

- Provides holistic view of physical, network, and reputational risks posed by vendors
- Way to “trust but verify” vendor self-disclosures/track the improvement or degradation of a vendor’s risk profile

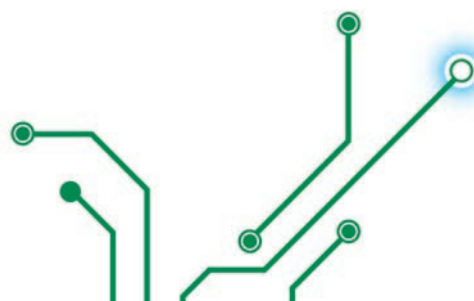

Special Investigations Unit (SIU)

- Customized services from experts in the fields of cyber intelligence, intelligence studies, security, terrorism, law, and behavioral studies
- Supplement your customers’ in-house security teams with decades of combined experience conducting open source investigations and threat analysis

Cyber Security Awareness Training

- Award-winning computer-based training modules
- Save clients millions of dollars in IT, data loss, and legal costs
- Reduce risks that technology and firewalls don’t stop, such as spear phishing and advanced cyber attacks that lead to network breaches and data theft
- Cloud-hosted and LMS (SCORM-compliant) delivery models

LookingGlass ScoutVision Threat Intelligence Platform

Offer Threat Intelligence as a Service to your customers to create added value

MSSPs integrate the ScoutVision Threat Intelligence Platform (TIP) with their existing security analysis to deliver a more comprehensive and expanded view of potential threats to their clients.

Offer Threat Intelligence as a Service to Your Customers

The ScoutVision Threat Intelligence Platform allows MSSP analysts, SOC and IR teams to harness multi-source threat intelligence to enhance visibility for security forensics and faster incident response. Your clients have a myriad of security solutions, yet they are exposed. You can add unique value to them with ScoutVision.

- Unlike other TIPs, ScoutVision saves you time and money as it comes with 120+ high-quality data feeds. No hidden data feed fees or integration development delays.
- Leverage ScoutVision's RESTful API to integrate with SIEMs, open source, third party and proprietary data feeds, and existing security solutions to have a "single pane of glass" solution for all your client's Threat Intelligence needs.

Services Built on the ScoutVision Threat Intelligence Platform

As a Service (Cloud) as an annual subscription—SVaaS comes with a basic set of Threat Intelligence feeds at no additional charge.

Hosted in the LookingGlass data center in Baltimore, Maryland (we perform all maintenance and updates); with a richer Threat Intelligence feed pack available in the hosted and on-premise models, and the option to add additional feeds per MSSP.

What is Our Commitment to MSSPs?

- Enablement so you can determine the best service to offer your customers.
- Provide guidance on how to do the analysis required, whether you want to leverage your own analysts or ours.
- Review your new threat intelligence services collateral for accuracy, so the service is clearly depicted to the customer.
- Include your MSSP listing on our Partner Locator on the LookingGlass website (at no charge), so customers seeking these services can find a capable MSSP.
- Provide support for the solution acquired under our maintenance agreement.
